This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1 to 13 (Cancelled).

- 14. (Currently amended) A method of treating <u>acute</u> pancreatitis which method comprises administering an interleukin-6 (IL-6) antagonist at an amount effective to treat <u>acute</u> pancreatitis to a subject in need of such treatment, <u>wherein said IL-6 antagonist</u> <u>binds to IL-6 receptor and inhibits the binding of IL-6 or gp-130 to the IL-6 receptor wherein said IL-6 antagonist is an antibody directed against IL-6 receptor.</u>
- 15. (Cancelled)
- 16. (Currently amended) The therapeutic method according to claim 15 14 in which the antibody directed against IL-6 receptor is a monoclonal antibody directed against IL-6 receptor.
- 17. (Previously presented) The therapeutic method according to claim 16 in which the antibody directed against IL-6 receptor is a monoclonal antibody directed against human IL-6 receptor.
- 18. (Previously presented) The therapeutic method according to claim 16 in which the antibody directed against IL-6 receptor is a monoclonal antibody directed against mouse IL-6 receptor.
- 19. (Currently amended) The therapeutic method according to claim 15 14 in which the antibody directed against IL-6 receptor is a recombinant antibody.
- 20. (Previously presented) The therapeutic method according to claim 17 in which the monoclonal antibody directed against human IL-6 receptor is PM-1 antibody.

- 21. (Previously presented) The therapeutic method according to claim 18 in which the monoclonal antibody directed against mouse IL-6 receptor is MR16-1 antibody.
- 22. (Currently amended) The therapeutic method according to claim 15 14 in which the antibody directed against IL-6 receptor is a chimeric antibody or a humanized antibody directed against IL-6 receptor.
- 23. (Previously presented) The therapeutic method according to claim 22 in which the humanized antibody directed against IL-6 receptor is a humanized PM-1 antibody.
- 24. (Cancelled)

٠;

- 25. (Previously presented) A method of reducing pancreatic edema in pancreatitis which method comprises administering an IL-6 antagonist to a subject in need of such treatment, wherein said IL-6 antagonist binds to IL-6 receptor and inhibits the binding of IL-6 or gp 130 to the IL-6 receptor.
- 26. (Previously presented) A method of reducing pancreatic edema which method comprises administering an antibody directed against IL-6 receptor at an amount effective to prevent or treat pancreatic edema to the subject in need of suppressing pancreatic edema.

Claims 27 to 39 (Cancelled).
